

Water Efficiency Programs for your **Business**

**WATER AUDITS,
EVALUATIONS, and
RECOMMENDATIONS
for Industrial,
Commercial, and
Institutional
Businesses**

Comprehensive
water-use
assessments

Experienced engineers
and scientists share
their skills to reduce
utility costs

Reports detail cost /
benefit analysis for
water-use
improvements

Program supported
by North Carolina and
local government

Waste Reduction Partners

Waste Reduction Partners

What does Waste Reduction Partners do?

- Helps customers identify and evaluate water efficiency opportunities through facilities assessments.
- Analyzes water consumption data and visually audits water uses throughout the facility.
- Delivers a comprehensive report with recommendations for cost savings through improved water efficiency.
- Develops customer's historical water use profile, trend, water balance, benchmarks, cost/benefit analysis and recommendations.

Who uses Waste Reduction Partners services?

- Any industrial, commercial, or institutional entity that seeks to use water more efficiently to reduce costs.
- WRP works with local water utilities in support of their customers.

How is work performed?

- Waste Reduction Partners uses engineers, scientists and executives who have retired from their principal occupations.
- These volunteers have extensive practical experience. WRP has served 2200 clients since 1992.

Partnerships

- WRP is a program of Land-of-Sky Regional Council and Triangle J Council of Governments. It works in partnership with the NC DEAO.
